

# General Microbiology 11:680:390

## Application for Waitlist (Special Permission Number) and/or Prerequisite Override

If the course is closed (i.e. full) you will need to register on the waitlist. Waitlist priority will depend on your major, class and other considerations for taking the course in the given semester. *Special Permission Numbers* needed for registration will typically be given out a week before classes depending on demand. Space is limited and we cannot guarantee you a spot. We urge you to check online whether a section opens.

If your pre-requisites for the course (General Biology 01:119:101-102; General Chemistry 01:160:161-162; Organic Chemistry 01:160:307 or 01:160:315, or equivalent) are not recognized by the computer system you will need a *Prerequisite Override* (available from Lipman Hall Room 327). The Prerequisite Override will allow you to register for an open section.
