

Plant Biology Seminar Series - Fall 2007

Fridays 12:35 pm, 138A Foran Hall, Cook Campus

<u>Date</u>	<u>Speaker</u>	<u>Topic</u>	<u>Host</u>
Sept. 14	Cook Graduate Student Barbecue	12:00-2:00 Skelly Field	Prior registration required.
Sept. 21	<i>No seminar</i>		
Sept. 28	Dr. Nicole Donofrio, Univ. of Delaware.	Conducting Business Under Pressure: Examining Stress Management Programs in <i>Magnaporthe oryzae</i>	Don Kobayashi
Oct. 5	Dr. Leon Neuteboom, Liden University, NL	When I Snap My Zinc Fingers..... Commanding Genes What To Do	Randy Kerstetter
Oct. 12	<i>No seminar</i> Biotech meeting		
Oct. 19	Dr. Todd Michael, Rutgers Univ. Waksman Inst.	Conserved Time of Day Specific Transcriptional Networks Control Growth	Randy Kerstetter
Oct. 26	Dr. Tara VanToai, USDA-ARS Ohio	Microarray Analysis: Linking Genes, Genomes, and Expression to the Biology of Flooding Stress Responses	Bingru Huang
Nov. 2	Dr. Sondra Lazarowitz, Cornell	Intercellular Trafficking in Plants: Viruses Touch a Nerve	Nilgun Tumer
Nov. 9	Dr. Kathi Hudak, York University, Toronto	Effect of Depurination on the Accumulation of Brome Mosaic Virus RNAs	Nilgun Tumer
Nov. 16	Dr. Prakash Masurekar, Ernest Mario School of Pharmacy	Drugs from Natural Products: Development of Microbial Processes for Their Production	Joan Bennett
Nov. 23	<i>No seminar</i> Thanksgiving Recess		
Nov. 30	Dr. Caroline Roper, Univ. Connecticut	Genomic Analysis Leads to a Better Understanding of the Mechanisms of Pathogenicity of the Fastidious Prokaryote, <i>Xylella fastidiosa</i> , During Pierce's Disease of Grapevine	Ann Gould
